

Surfs Up At Halifax School Thanks to Altro Wall Cladding

Altro Digiclad

It may be cold and miserable outside but students at Hipperholme and Lightcliffe School in Halifax are enjoying a taste of sunshine thanks to a makeover with Altro Digiclad wall displays.

The school have had the uniquely designed, retro Digi-clad walls fitted to add a fresh and funky feel to the computer studies room. A 7m graphic panel depicting a tropical island mural has been installed, together with surf board tables and wall mounted displays to complete the theme for the room.

Digiclad is a unique, hygienic wall fixture or partition that is simple, yet cost effective. Altro's unique system provides an aesthetically pleasing, easy to clean wall or partition that can be tailored to individuals needs. Available in a range of colours or with uniquely designed prints it is ideal for restaurants, shops, schools and work places.

"We wanted to give the new computer studies room a really vibrant and funky new look that the students would enjoy. We were looking for a product that was eye-catching but robust enough to be in a busy school environment. Altro's Digiclad was the ideal choice as it fitted all of the practical requirements and could also be customised to create a really colourful graphic which offered a great backdrop for the room. The children all love it."

Michael Horrocks, head teacher.
