

Altro Whiterock Digiclad Makes Waves at St Ebba's

Altro Whiterock Digiclad

Interior surfaces expert Altro has helped Surrey and Borders Partnership NHS Trust achieve a stunning finish for their newest therapy unit, Oasis, at St Ebba's Hospital in Epsom.

Altro Whiterock Digiclad was used throughout the Oasis, a brand new hydrotherapy suite, creating a striking pattern of multicoloured waves flowing around the rooms within the suite. Digiclad was chosen as it offered the renowned hygienic properties of Altro's easy to clean wall cladding range alongside its striking visual look, which helped to create a safe and attractive environment for staff, patients and visitors.

Altro Whiterock Digiclad is a unique service that allows you to print your choice of image directly onto Whiterock. From adding a stylish backdrop to a room or simply incorporating your company logo, you can create your own distinctive designs. These washable murals use durable, cured inks to provide enhanced resistance to wear and tear in busy, hygienic areas. Available in either a high gloss or satin finish and with extra coatings available for very busy areas to ensure your walls stay looking good for longer.

Altro Whiterock is a semi-rigid hygienic PVCu wall cladding with an easy to clean surface that is low maintenance and offers resistance to stains, chemical spillages and impact. When compared to ceramic tiles and other cladding systems, both new ranges provide innovative and functional options. And with no grout or cracks, the seamless finish of Altro Whiterock gives fewer areas for bacteria and moisture to hide so is ideal for situations where hygiene is paramount.

"We have used Altro products extensively throughout the hospital for many years now, and have always been impressed with their performance. We have previously used Altro Whiterock, so knew it would stand up to the specification we set. The staff in the Oasis are thrilled with the look of the walls within the new suite."

Paul Jenkins, Surrey and Borders Partnership NHS Trust

"We were very proud of the finish achieved at St Ebba's. Altro's Whiterock Digiclad allowed us to create a series of coloured patterns that transformed a very plain wall installation into something much more vibrant and eye-catching. Since employing our first Whiterock fitters a few years ago, our experienced Altro floor layers have found working alongside them to be a rewarding new challenge. We have made plans to train more Whiterock installers to cope with the huge demand for this product."
