## **ALTRO PRODUCTS HELP TAME DIRT AT TOP ZOO**

### **Altro Whiterock and Altro Maxis have been used in a newly built café at Twycross Zoo in Warwickshire.**

Staff at Twycross Zoo have been very impressed with the performance of both Altro products, particularly their cleaning properties. Altro Whiterock wall cladding has been installed throughout the brand new café, whilst Altro Maxis has been installed in the public areas of the building. Specifiers chose Whiterock because it offered much better cleaning properties and durability when compared to traditional ceramic tiles.

Managers at Twycross Zoo have been so impressed with the performance of Altro's products that they have immediately ordered a second phase of flooring renovation, almost straight after completing the first.

Paul Bramble, Twycross Zoo's Head of Catering, said: "We're absolutely delighted with the way both Altro products have performed. The Whiterock has performed exceptionally well; with messy hand prints simply wiped away. The slip resistance of Maxis is excellent even in wet conditions. It takes less effort to clean than other floors at the zoo and holds its colour remarkably well. In fact, the floor is so easy to clean we've hardly used the brand new industrial cleaning machine we bought to clean it! We are more than happy to specify Altro Maxis and Altro Whiterock in other areas of the Zoo."
